Packaging and Packaging Waste Regulation (EU) 2025/40 compliance statement

Allegion Netherlands B.V., a subsidiary of Allegion PLC, recognizes the requirements of the Packaging and Packaging Waste Regulation (EU) 2025/40 (PPWR) and is committed to managing packaging-related compliance throughout its supply chain.

Based on information obtained from our packaging suppliers and manufacturers, and through our internal compliance processes, the packaging materials and packaging components used for products supplied by Allegion Netherlands B.V. are reviewed and managed with the objective of:

- Eliminating and minimizing the presence of hazardous substances and substances of concern in packaging;
- complying with applicable restrictions on heavy metals in packaging materials and packaging components;
- supporting the collection, sorting and recycling of packaging materials at end-of-life;
- reducing packaging material, weight and volume to the minimum necessary for product protection, handling, storage and transportation.

To support these objectives, Allegion Netherlands B.V. works closely with its packaging suppliers and maintains a process for collecting and reviewing relevant compliance information, including supplier declarations, material specifications, certificates, technical data and, where available, test reports.

The information currently available to us indicates that the combined concentration of lead (Pb), cadmium (Cd), mercury (Hg) and hexavalent chromium (Cr VI) in packaging materials and packaging components does not exceed the limit established under applicable European packaging legislation.

Packaging-related compliance information is maintained within supplier technical dossiers and internal records. These dossiers are intended to support regulatory compliance obligations and may include declarations, specifications, certificates and other supporting documentation obtained through the supply chain.

Where one of our customers receives a request from a competent authority, market surveillance authority, customs authority or other regulatory body regarding packaging compliance, Allegion Netherlands B.V. will make reasonable efforts to provide available supporting documentation from these technical dossiers, subject to confidentiality obligations and the availability of information within the supply chain.

ALLEGION

This declaration is based on information available at the date of issue and reflects our current understanding of the composition and regulatory status of the packaging materials used. It will be reviewed and updated as necessary in response to regulatory developments, supplier updates or material changes.

Sincerely,

John Stanley

Vice President - Global Portable Security
Allegion
