DECLARATION OF PERFORMANCE

No. 0048 – EN

1. Unique identification code of the product-type: **fischer frame fixing SXR/SXRL**

2. Intended use/es:

Product	Intended use/es
Plastic anchors for use in concrete and masonry	For use in systems, such as façade systems, for fixing or supporting elements which contribute to the stability of the systems, see appendix, especially Annexes B 1 to B 4

3. Manufacturer: **fischerwerke GmbH & Co. KG, Klaus-Fischer-Straße 1, 72178 Waldachtal, Germany**

4. Authorised representative: **--**

5. System/s of AVCP: **2+**

6a. Harmonised standard: ---

Notified body/ies: ---

6b. European Assessment Document: **ETAG 020, 2012-03**

European Technical Assessment: **ETA-07/0121; 2015-04-10**

Technical Assessment Body: **DIBt**

Notified body/ies: **1343 – MPA Darmstadt**

7. Declared performance/s:

Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Anchorages satisfy requirements for Class A 1
Resistance to fire	See appendix, especially Annex C 2

Safety and accessibility (BWR 4)

Essential characteristic	Performance
Characteristic resistance for tension and shear loads	See appendix, especially Annexes C
Characteristic resistance for bending moments	See appendix, especially Annex C 1
Displacements under shear and tension loads	See appendix, especially Annex C 2
Anchor distances and dimensions of members	See appendix, especially Annex B 2 – B 3

8. Appropriate Technical Documentation and/or Specific Technical Documentation: ---

The performance of the product identified above is in conformity with the set of declared performance/s. This declaration of performance is issued, in accordance with Regulation (EU) No 305/2011, under the sole responsibility of the manufacturer identified above.

Signed for and on behalf of the manufacturer by:

Andreas Bucher, Dipl.-Ing.

Wolfgang Hengesbach, Dipl.-Ing., Dipl.-Wirtsch.-Ing.

Tumlingen, 2015-04-20

- This DoP has been prepared in different languages. In case there is a dispute on the interpretation the english version shall always prevail.
- The Appendix includes voluntary and complementary information in English language exceeding the (language-neutrally specified) legal requirements.

Specific Part

1 Technical description of the product

The fischer frame fixing in the range SXR 8, SXR 10 and SXRL 10 is a plastic anchor consisting of a plastic sleeve made of polyamide and an accompanying specific screw of galvanised steel, of galvanised steel with an additional Duplex-coating or of stainless steel.

The plastic sleeve is expanded by screwing in the specific screw which presses the sleeve against the wall of the drilled hole.

The product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchors of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Mechanical resistance and stability (BWR 1)

The essential characteristics regarding mechanical resistance and stability are included under the Basic Works Requirement Safety in use.

3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Anchorages satisfy requirements for Class A 1
Resistance to fire	See Annex C 2

3.3 Hygiene, health and the environment (BWR 3)

Not applicable

3.4 Safety and accessibility (BWR 4)

Essential characteristic	Performance
Characteristic resistance for tension and shear loads	See Annexes C
Characteristic resistance for bending moments	See Annex C 1
Displacements under shear and tension loads	See Annex C 2
Anchor distances and dimensions of members	See Annex B 2 – B 3

3.5 Protection against noise (BWR 5)

Not applicable

3.6 Energy economy and heat retention (BWR 6)

Not applicable

3.7 Sustainable use of natural resources (BWR 7)

The sustainable use of natural resources was not investigated.

3.8 General aspects

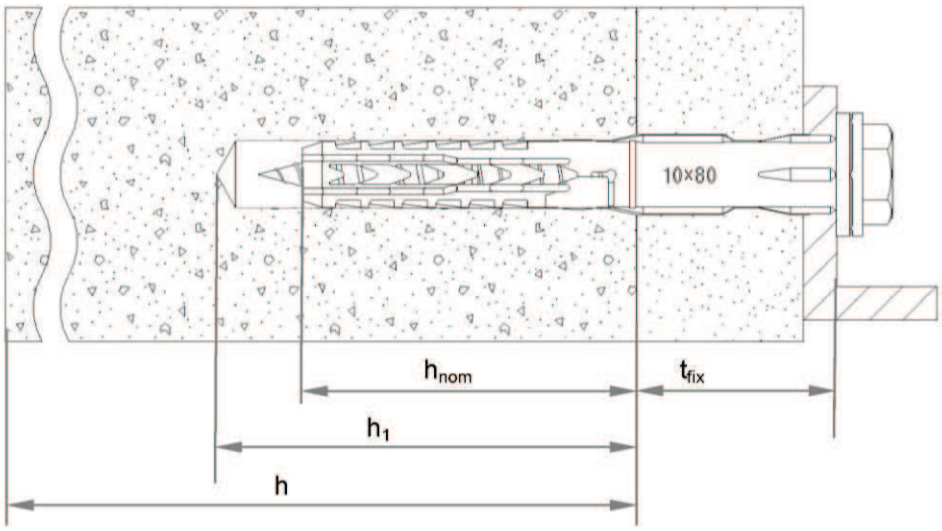
The verification of durability is part of testing the essential characteristics. Durability is only ensured if the specifications of intended use according to Annex B are taken into account.

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

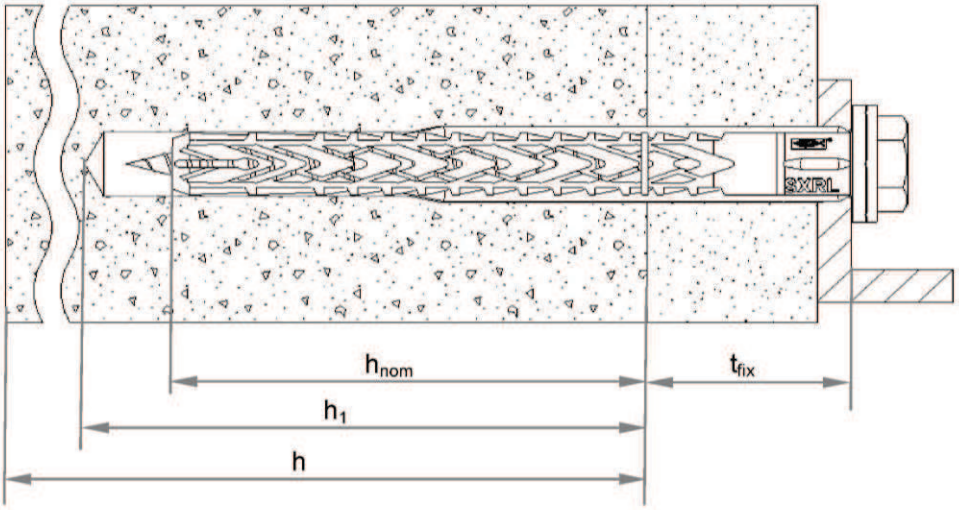
According to Decision 97/463/EC of the Commission of 27 June 1997 (Official Journal of the European Communities L 198 of 25.07.1997, p. 31–32) the system of assessment and verification of constancy of performance (AVCP) (see Annex V and Article 65 Paragraph 2 to Regulation (EU) No 305/2011) given in the following table applies.

Product	Intended use	Level or class	System
Plastic anchors for use in concrete and masonry	For use in systems, such as façade systems, for fixing or supporting elements which contribute to the stability of the systems	—	2+

SXR



SXRL



Legend

h_{nom} = overall plastic anchor embedment depth in the base material

h_1 = depth of drill hole to deepest point

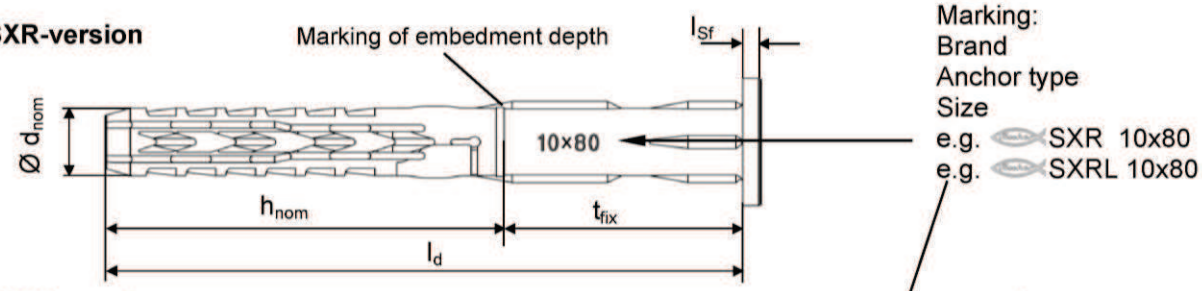
h = thickness of member (wall)

t_{fix} = thickness of fixture and / or non-load bearing layer

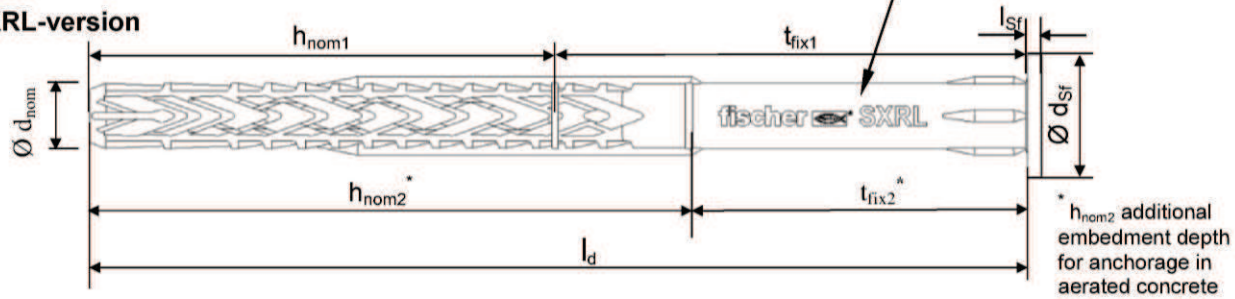
fischer frame fixing SXR / SXRL	**Annex A 1**
Product description Installed anchor	

Anchor sleeves – flat collar versions of SXR and SXRL

SXR-version

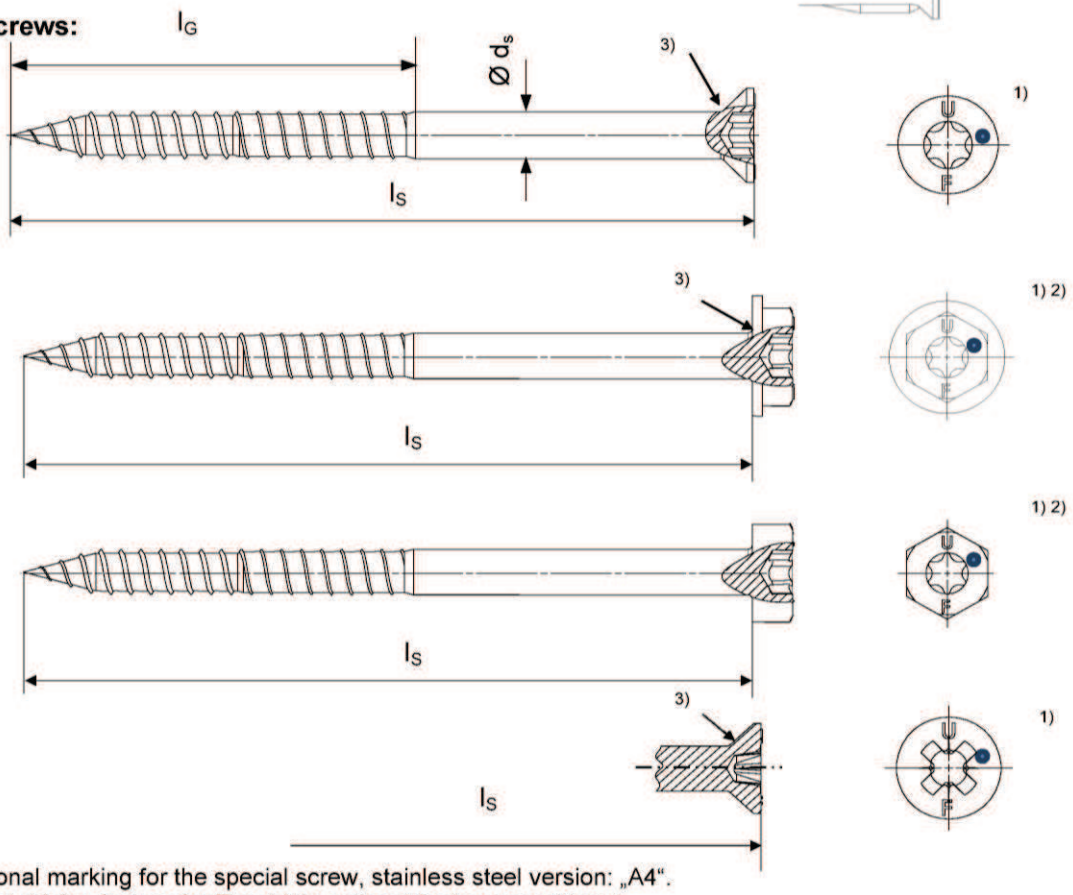


SXRL-version



Countersunk version also available for both versions

Special screws:



1) Additional marking for the special screw, stainless steel version: „A4“.
2) Internal driving feature for Torx bit is optional for hexagonal head
3) Optional additional version with underhead ribs

fischer frame fixing SXR / SXRL

1) To ensure that the screw penetrates the anchor sleeve, l_s must be $l_d + l_{Sf}$ [3)] + 7 mm
2) To ensure that the screw penetrates the anchor sleeve, l_s must be $l_d + l_{Sf}$ [3)] + 6 mm
3) Only valid for flat collar version
4) Additional for use in aerated concrete

Table A3.2: Materials

Name	Material
Anchor sleeve	Polyamide, PA6, colour grey
Special screw	- Steel gvz A2G or A2F acc. to EN ISO 4042:2001-01 **or** - Steel gvz A2G or A2F acc. to EN ISO 4042:2001-01 + Duplex-coating type Delta-Seal in three layers (total layer thickness ≥ 6 µm) **or** - Stainless steel acc. to EN 10 088-3:2014, e.g. 1.4401, 1.4571, 1.4578, 1.4362

Specifications of intended use

Anchorages subject to:
- Static and quasi-static loads.
- Multiple fixing of non-structural applications.

Base materials:
- Reinforced or unreinforced normal weight concrete with strength classes ≥ C12/15 (use category “a”), according to EN 206-1:2000.
- Solid brick masonry (use category “b”), according to Annex C3, C7, C8 and C14.
  Note: The characteristic resistance is also valid for larger brick sizes and higher compressive strength of the masonry unit.
- Hollow brick masonry (use category “c”), according to Annex C4 – C6, C9 - C15.
- Autoclaved aerated concrete (use category “d”), according to Annex C16.
- Mortar strength class of the masonry ≥ M2,5 according to EN 998-2:2010.
- For other base materials of the use categories “a”, “b”, “c” and “d” the characteristic resistance of the anchor may be determined by job site tests according to ETAG 020, Annex B, Edition March 2012.

Temperature Range:
SXR 8 and 10
- c: - 40 °C to 50 °C (max. short term temperature + 50 °C and max long term temperature + 30 °C)
- b: - 40 °C to 80 °C (max. short term temperature + 80 °C and max long term temperature + 50 °C)

SXRL 10
- c: - 20 °C to 50 °C (max. short term temperature + 50 °C and max long term temperature + 30 °C)
- b: - 20 °C to 80 °C (max. short term temperature + 80 °C and max long term temperature + 50 °C)

Use conditions (Environmental conditions):
- Structures subject to dry internal conditions (zinc coated steel, stainless steel).
- The specific screw made of galvanised steel or galvanised steel with an additional Duplex-coating may also be used in structures subject to external atmospheric exposure, if the area of the head of the screw is protected against moisture and driving rain after mounting of the fixing unit in this way, that intrusion of moisture into the anchor shaft is prevented. Therefore there shall be an external cladding or a ventilated rainscreen mounted in front of the head of the screw and the head of the screw itself shall be coated with a soft plastic, permanently elastic bitumen-oil-combination coating (e.g. undercoating or body cavity protection for cars).
- Structures subject to external atmospheric exposure (including industrial and marine environment) and to permanently damp internal condition, if no particular aggressive conditions exist (stainless steel).

  Note: Particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor swimming pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where de-icing materials are used).

Design:
- The anchorages are to be designed in accordance with the ETAG 020, Annex C under the responsibility of an engineer experienced in anchorages and masonry work.
- Verifiable calculation notes and drawings shall be prepared taking account of the loads to be anchored, the nature and strength of the base materials and the dimensions of the anchorage members as well as of the relevant tolerances. The position of the anchor is indicated on the design drawings.
- Fasteners are only to be used for multiple use for non-structural application, according to ETAG 020, Edition March 2012.

Installation:
- Hole drilling by the drilling method according to Annex C3 – C16 for use categories “b”, “c” and “d”.
- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site.
- Installation temperature from SXR 8/10: -5°C to + 40°C
  SXRL 10: -20°C to + 40°C
- Exposure to UV due to solar radiation of the not protected anchor ≤ 6 weeks.

fischer frame fixing SXR / SXRL	**Annex B 1**
Intended use Specifications	

Table B2.1: Installation parameters

Anchor type			SXR 8	SXR 10	SXRL 10
Drill hole diameter	d_0 =	[mm]	8	10	10
Cutting diameter of drill bit	d_{cut} ≤	[mm]	8,45	10,45	10,45
Depth of drill hole to deepest point [1]	h_1 ≥	[mm]	60	60	80/100[3]
Overall plastic anchor embedment depth in the base material [1) 2)]	h_{nom} ≥	[mm]	50	50	70/90[3]
Diameter of clearance hole in the fixture	d_f ≤	[mm]	8,5	10,5/12,5[4]	10,5/12,5[4]

1) See Annex A1.
2) If the embedment depth is higher than h_{nom} given in Table B2.1 (only for hollow and perforated masonry), job site tests have to be carried out according to ETAG 020, Annex C.
3) Only for use in aerated concrete.
4) See Table Table C2.1.

Table B2.2: Minimum thickness of member, edge distance and spacing in concrete

Anchor type		Min. thickness of member h_{min} [mm]	Characteristic edge distance $c_{cr,N}$ [mm]	Characteristic spacing $s_{cr,N}$ [mm]	Min. spacing and edge distances [1] [mm]
SXR 8	≥ C16/20	100	50	65	s_{min} = 50 for c ≥ 50 c_{min} = 50 for s ≥ 50
	C12/15		70	70	s_{min} = 70 for c ≥ 70 c_{min} = 70 for s ≥ 70
SXR 10	≥ C16/20		100	90	s_{min} = 50 for c ≥ 150 c_{min} = 60 for s ≥ 70
	C12/15		140	100	s_{min} = 70 for c ≥ 210 c_{min} = 85 for s ≥ 100
SXRL 10[2)]	≥ C16/20	100	100	105	s_{min} = 50 for c ≥ 100 c_{min} = 50 for s ≥ 125
	C12/15		140	120	s_{min} = 70 for c ≥ 140 c_{min} = 70 for s ≥ 175

1) Intermediate values by linear interpolation.
2) Values valid for reinforced concrete.
Please note: Values for non-reinforced-concrete are h_{min} = 110 mm and c_{min} = s_{min} = 80 mm for concrete ≥ C16/20 and c_{min} = s_{min} = 110 mm for C12/15.

Fixing points with a spacing a ≤ $s_{cr,N}$ are considered as a group with a max. characteristic resistance $N_{Rk,p}$ acc. to Table C1.3. For a spacing a > $s_{cr,N}$ the anchors are considered as single anchors, each with a characteristic resistance $N_{Rk,p}$ acc. to Table C1.3

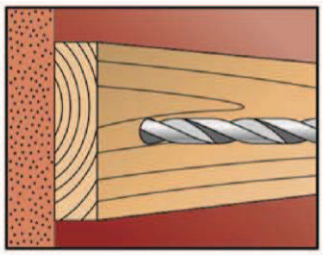
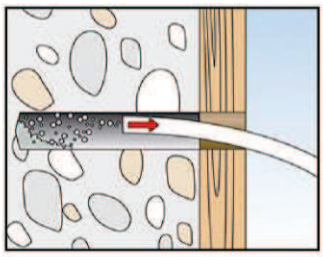
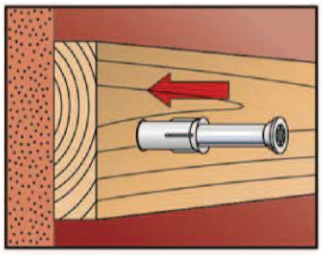
Installation instructions (the following pictures show fixing through timber)



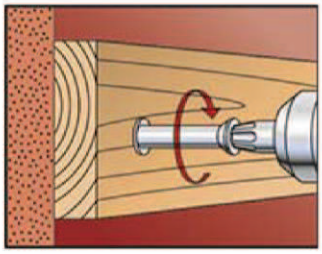
1. Drill the bore hole Ø 8 mm (SXR 8) and Ø 10 mm (SXR 10 / SXRL 10) using the drill method described in the corresponding annex.



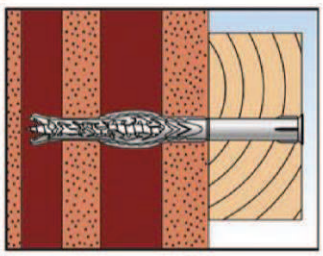
2. Remove dust from borehole.



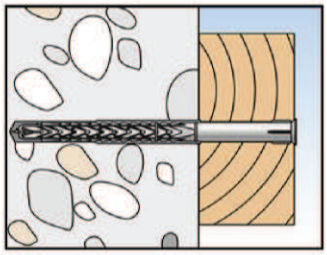
3. Insert anchor (screw and plug) by using a hammer until the collar of the plastic sleeve is flush with the surface of the fixture.



4. The screw is screwed-in until the head of the screw touches the sleeve.



5. Correctly installed anchor in hollow masonry.



6. Correctly installed anchor in concrete.
