* The advice is to fix the dispenser on the wall with screws. If this is not possible, the double sided tape **6** can be used.

1

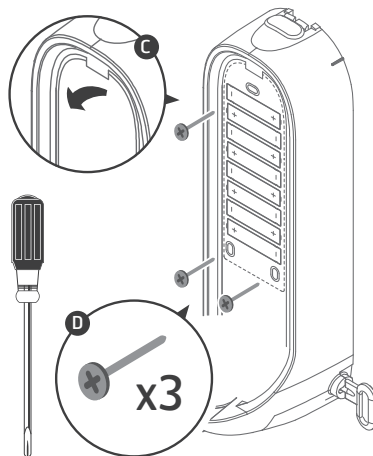

Cut out the template on the bottom of the box to drill holes.

2

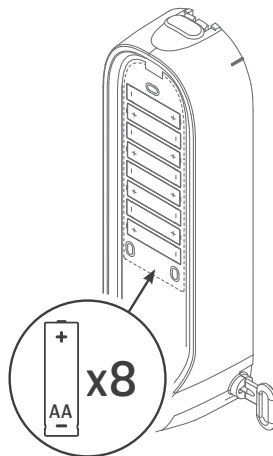

Insert key **1** or **2** into the dispenser. Turn key (A) to unlock and open the dispenser (B).

3

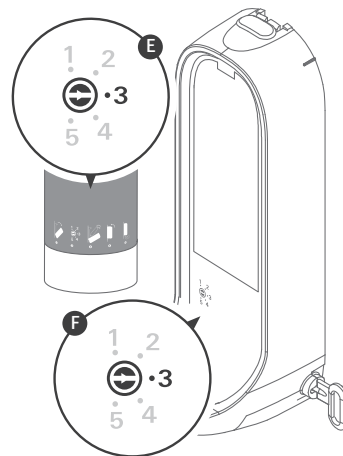

Open battery door (C), fix the dispenser on the wall with screws through the holes (D).

4

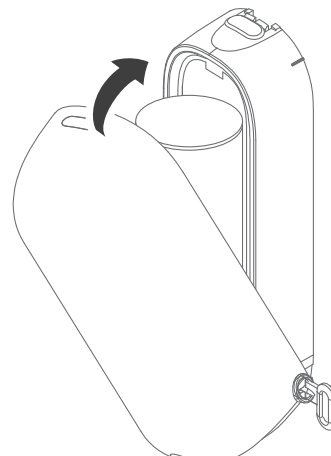

Place the batteries and close the battery door.

5

See product cartridge for the right configuration (E). Configure the dispenser (F).

6

Put the cartridge in the dispenser and the dispenser is ready for use!
